#### REGIONAL

Well it's that time of year again when we dump a million tons of figures on you!! We normally do this in May but we time it for the Exhibition which is in June so we are a little late! However just to make up for this appalling late delivery we have dumped a further six pages, making twelve in all, to fill you with mathematical despair.

The first table is the twelve year regional table which starts below with East Anglia. You will see your twelve year fares and where you were in the national tables each year from 1999 and how much extra you have got in fares from then till now. Just below these words you will see the average twelve year percentage increases for your area, and if you turn to page XXX you will be able to compare your own individual licensing area tariff percentages over the same twelve years. I do have to say there are quite a number of you who have done quite well with twelve areas having had rises of 100% or better! But you can see for yourself on these pages.

If your percentage figure is less than your area average you will see the percentage in red, if up with or better than average, the figures will be in black.

In doing these figures I was interested to see if there was any footprint that came forward in areas that still regulate taxi numbers, (header in yellow) those areas that have all WAV fleets (header in pink) and if both (header in yellow and pink) but nothing seems to matter in those areas.

Having said that in those areas where deregulation has set in....look at how many years those areas have not had a rise for, simply in my view because the trade is terrified of losing any further business.

In any event I hope that these figures will assist you and I am pleased to announce that for the first time The NPHA will soon be having a web site www.npha.org.uk and these figures will be accessible to all members and will be updated each month
